SAVIN SHREDMAN™ SHREDDERS

For over 35 years, the Savin name has been synonymous with quality and reliability in office equipment. Now, the company that pioneered plain paper copier technology brings you document shredders suitable for almost every size office or company.

Why shredders? Because today, businesses have more and more information – much of it on paper. And more than ever, privacy – document security—is increasingly important. Your company's confidential information is what gives you a competitive advantage. And how you dispose of this information will help to keep it out of unfriendly hands.

Savin Shredman Shredders offer you both the peace of mind that comes with document security, and a brand name you can trust.

Use this brochure to preview our comprehensive line of strip-cut and cross-cut shredders. Then, contact representatives from our nationwide network of authorized Savin Dealers. They can give you additional information and a product demonstration, and help you select the right Savin Shredman Shredder for your office.

CHOOSING A SAVIN SHREDMAN SHREDDER

There are two types of shredders—strip-cut and cross-cut. They come in a variety of configurations that permit shredding of many sizes of documents – from standard letterhead to stacks of computer form feed paper. Strip-cut models shred documents into narrow strips, while cross-cut models shred paper into tiny particles—as small as $\frac{3}{32}$ " x $\frac{5}{8}$ ". Both strip-cut and cross-cut shredders come in a range of sizes with sheet capacities, feed openings and speeds to meet low- to high-volume shredding needs.

Strip-cut shredders are suitable for many office environments. They are relatively inexpensive, and turn documents into narrow, unreadable strips. Cross-cut shredders meet more stringent security requirements, as tiny cross-cut particles are truly impossible to reassemble.

The output of both strip-cut and cross-cut shredders is automatically bagged for easy disposal. Because of its small particle size, cross-cut output is more compact; however, strip-cut output can be recycled as packing material for fragile objects. Both strip-cut and cross-cut shredders are relatively maintenance-free and are designed to operate for years.

Because they are easy to use and maintain, Savin Shredman Shredders will help make shredding a standard office procedure for the disposal of sensitive materials.

SHREDMAN 2401

Strip-Cut

Shred Size: $3/32$ "

Sheet Capacity: 7-9

Feed Opening: $9\ 1/2$ "

Speed: 27 ft./min.

Horsepower

Normal: $1/8$ HP

Maximum: $1/3$ HP

Cross-Cut

Shred Size: $3/32$ " x $5/8$ "

Sheet Capacity: 6-8

Feed Opening: $9\ 1/2$ "

Speed: 14 ft./min.

Horsepower

Normal: $1/8$ HP

Maximum: $1/3$ HP

Features

Automatic start/stop via photo cell

Automatic stop when bag full or jammed

Cutting head takes staples and paper clips

Enclosed cabinet on casters

Cabinet door can be positioned in front or rear

Convenient flap for non-confidential waste

SHREDMAN 2601

Strip-Cut

Shred Size: $3/16$ "

Sheet Capacity: 18-20

Feed Opening: $10\ 1/4$ "

Speed: 24 ft./min.

Horsepower

Normal: $1/4$ HP

Maximum: 1 HP

Cross-Cut

Shred Size: $3/32$ " x $5/8$ "

Sheet Capacity: 9-12

Feed Opening: $10\ 1/4$ "

Speed: 24 ft./min.

Horsepower

Normal: $1/4$ HP

Maximum: 1 HP

Features

Automatic start/stop via photo cell

Automatic stop when bag full or jammed

Cutting head takes staples and paper clips

Enclosed cabinet on casters

Stand-by switch for power supply

Computer paper rack option

SHREDMAN 2602

Strip-Cut

Shred Size: $3/16$ "

Sheet Capacity: 21-23

Feed Opening: $10\ 1/4$ "

Speed: 30 ft./min.

Horsepower

Normal: $1/4$ HP

Maximum: $4/5$ HP

Cross-Cut

Shred Size: $3/32$ " x $5/8$ "

Sheet Capacity: 9-12

Feed Opening: $10\ 1/4$ "

Speed: 28 ft./min.

Horsepower

Normal: $1/4$ HP

Maximum: $4/5$ HP

Features

Automatic start/stop via photo cell

Automatic stop when bag full or jammed

Cutting head takes staples and paper clips

Enclosed cabinet on casters

Stand-by switch for power supply

Computer paper rack option

Take up to 27 sheets at once and shred up to 418 lbs. per hour

SHREDMAN 3802

Strip-Cut

Shred Size: $3/16$ "

Sheet Capacity: 16-18

Feed Opening: 16"

Speed: 35 ft./min.

Horsepower

Normal: 1/4 HP

Maximum: 1 HP

Cross-Cut

Shred Size: $3/32$ " x $5/8$ "

Sheet Capacity: 8-10

Feed Opening: 16"

Speed: 24 ft./min.

Horsepower

Normal: 1/4 HP

Maximum: 1 HP

Features

Automatic start/stop via photo cell

Cutting head takes staples and paper clips

Enclosed cabinet on casters

Cabinet door can be positioned in front or rear

Stand-by switch for power supply

Computer paper rack option

Electronic door safety switch

SHREDMAN 4004

Strip-Cut

Max. Shred Size: 1/4"

Min. Shred Size: 3/16"

Max. Sheet Capacity: 50-55

Min. Sheet Capacity: 1-34

Feed Opening: 16"

Top Speed: 60 ft./min.

Base Speed: 30 ft./min.

Horsepower

Normal: 2 HP

Maximum: 2 4/5 HP

Cross-Cut

Max. Shred Size: 3/32" x 5/8"

Min. Shred Size: 3/16" x 2 3/8"

Max. Sheet Capacity: 35-40

Min. Sheet Capacity: 1-19

Feed Opening: 16"

Top Speed: 48 ft./min.

Base Speed: 24 ft./min.

Horsepower

Normal: 2 HP

Maximum: 2 4/5 HP

Features

Automatic two-speed adjustment to paper quantity

Automatic start/stop via photo cell

Automatic stop when bag full or jammed

Cutting head takes staples and paper clips

Enclosed cabinet on casters

Cabinet door can be positioned in front or rear

Computer rack and sound cover options

Electronic door safety switch

Automatic speed adjustment to maintain productivity
